

Has your child been tested for lead?

How?

A simple finger stick test can check for lead!

When?

Test 6 month to 2 year olds for lead once a year if you live in a high risk area! All of Detroit is high risk!!

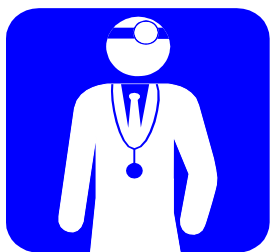

Test 3 to 6 year olds if not tested before.

Test for lead during the summer months lead poisoning occurs more in summer!

Where?

Go to your doctor or the health department for lead testing!

See your doctor. And remember to ask for the lead test results!
